

EXECUTIVE SUMMARY

Marylebone Smile Clinic demonstrates a strong digital presence with exceptional trust signals (5-star rating, 207 reviews) and comprehensive website content. The main areas requiring attention are mobile page speed (LCP of 7.2 seconds is hurting user experience) and underutilized marketing channels including email capture and paid advertising in a competitive London cosmetic dentistry market.

HEALTH CHECK OVERVIEW

PASSING

4

NEEDS WORK

0

CRITICAL

CHECK	FINDINGS	SCORE
Website Speed WARN	Mobile PageSpeed score is 59/100 with concerning LCP of 7,194ms (should be under 2,500ms). Desktop performs well at 89/100. Mobile speed needs urgent attention as most local searches happen on mobile devices.	5/10
Mobile Responsiveness PASS	Viewport meta tag is properly configured and site has responsive indicators. However, the poor mobile PageSpeed score (59) suggests render-blocking resources or unoptimized images are affecting mobile experience.	7/10
SEO Optimization PASS	Strong SEO fundamentals: meta description is 161 chars (within ideal range), canonical URL present, robots meta allows indexing, H1 tag present. Title tag contains keyword repetition ('Marylebone Smile Clinic' appears twice) which could be streamlined.	8/10
Google Reviews Rating PASS	Exceptional 5.0/5 rating with 207 reviews — this is outstanding social proof for a dental practice. This positions the clinic in the top tier of local competitors.	10/10
Social Media Presence PASS	Active presence on Facebook and Instagram — the two most relevant platforms for a cosmetic dental practice. Adding YouTube for smile transformation videos or LinkedIn for professional credibility could expand reach.	7/10
Posting Frequency WARN	Two social profiles detected with links from website. Content freshness signals suggest moderate activity, but without direct social data access, recommend auditing posting consistency — aim for 3-4 posts weekly showcasing transformations.	6/10
Branding Consistency PASS	Excellent brand cohesion: OG title and description configured, comprehensive schema markup (Place, WebSite, Article, FAQPage), consistent 'Marylebone Smile Clinic' naming across touchpoints. Professional Harley Street positioning reinforced throughout.	9/10
Call-to-Action Clarity PASS	Strong CTA implementation: dedicated CTA buttons present, phone number displayed on website, contact form available. Multiple conversion pathways give visitors clear next steps.	9/10
Lead Capture Forms PASS	Contact form confirmed on website with email contact capability. For a high-value service like cosmetic dentistry, consider adding a 'Free Smile Assessment' lead magnet to capture prospects earlier in their journey.	8/10
Conversion Optimization PASS	Strong conversion setup: CTA buttons, contact form, phone number visible, 5-star reviews as trust signals, and 5-Year Guarantee mentioned in meta description. The comprehensive approach supports visitor-to-lead conversion.	8/10
Content Quality PASS	Exceptional content depth with 9,551 words, 57 images, and 182 internal links. FAQPage schema indicates structured Q&A content. This comprehensive content supports both SEO and patient education needs.	10/10
Paid Ads Presence WARN	No clear evidence of tracking pixels or ad platform scripts detected from the scraped data. For a premium cosmetic dentist in competitive London market, paid search and social campaigns could significantly increase qualified leads.	5/10
Email Marketing Usage WARN	Contact form present but no dedicated newsletter signup or email capture lead magnet detected. Email marketing is underutilized — valuable for nurturing high-consideration cosmetic dentistry prospects over their decision journey.	5/10
Trust Signals PASS	Exceptional trust foundation: 5-star Google rating with 207 reviews, SSL secured, 5-Year Guarantee highlighted, 'Accredited Member of The Best Dental Organisations' mentioned, Harley Street location prestige, and Person schema for practitioner authority.	10/10
Technical Performance PASS	Strong technical SEO: SSL enabled, canonical URL configured, comprehensive robots meta directives, viewport tag present, rich schema markup (9 types including FAQPage and Article). Main concern is mobile Core Web Vitals performance.	8/10

STRENGTHS

- + Outstanding Google reputation with perfect 5.0 rating and 207 reviews — exceptional social proof
- + Comprehensive website content (9,551 words) with rich schema markup supporting SEO
- + Strong trust signals including 5-Year Guarantee, Harley Street credibility, and professional accreditations
- + Multiple conversion pathways with clear CTAs, contact form, and visible phone number
- + Excellent technical SEO foundation with proper meta tags, canonical URLs, and structured data

OPPORTUNITIES

- Implementing a 'Free Virtual Smile Assessment' lead magnet could capture prospects earlier and build email list
- Adding YouTube channel with smile transformation videos would leverage strong visual results and improve SEO
- Google Ads campaigns targeting 'cosmetic dentist London' and 'veneers Harley Street' could capture high-intent searchers
- Displaying Google review schema rich snippets could increase organic click-through rates significantly

RECOMMENDATIONS

Fix Critical Mobile Page Speed Issues

LCP of 7,194ms is nearly 3x the recommended threshold. Implement image lazy loading, optimize largest contentful paint elements (likely hero images), defer non-critical JavaScript, and consider a CDN. This directly impacts both user experience and Google rankings.

Implement Email Marketing Capture System

Add a prominent 'Free Smile Assessment Guide' or 'What to Expect at Your Consultation' PDF download in exchange for email. Set up an automated nurture sequence for cosmetic dentistry prospects who typically research for weeks before booking.

Launch Targeted Google Ads Campaigns

With 207 five-star reviews as a competitive advantage, invest in Google Ads targeting high-intent keywords like 'veneers London', 'cosmetic dentist Harley Street', and 'smile makeover UK'. Your trust signals will drive strong conversion rates.

Expand Video Content on YouTube

Create a YouTube channel showcasing before/after transformations, patient testimonials, and procedure explanations. Embed these on service pages to increase time-on-site and provide valuable content for social sharing.

Optimize Title Tags and Meta Structure

Rewrite the homepage title to remove duplication: 'Cosmetic Dentist Harley Street | 5-Star Rated | Marylebone Smile Clinic'. This improves CTR and uses the character limit more effectively to convey unique value propositions.

WEAKNESSES

- Poor mobile page speed (59/100) with critical LCP of 7,194ms — likely losing impatient mobile visitors
- No dedicated email newsletter signup or lead magnet for nurturing prospects
- Limited social media presence to only 2 platforms in a visually-driven industry
- No evidence of paid advertising tracking despite competing in high-CPC cosmetic dentistry keywords
- Title tag contains redundant repetition of clinic name, wasting valuable SERP real estate
